

TESOL

TESOLARABIA DUBAI CHAPTER NEWS

This season of workshops has been a good start to a revived chapter. The last meeting was the best attended to date, so perhaps there will be many more in our April meeting. So far this year, we have enjoyed an IT SIG, led by Will Moore, and a materials development morning, with Peter Hassall's edition of *Pearls of Emirati Wisdom* as an example of a collection that can be used in many different ways to foster language skills, and in February, Mabel Lahloue conducted a SIG ESP morning. The members all contributed their ideas and the exchange was very productive.

Many members would like to present papers, and this is very welcome. Please send in your names and abstract/summary, and I will post these as members' "spots" for the next two sessions of the year.

Stay tuned and support your area chapter:

Announcements will follow re the next meeting at Canadian University of Dubai on April 12th.
